HEALTH

All bulls have passed a breeding soundness exam. Bulls have received Bovishield Gold, Ultrabac 8 and Dectomax pour on. If bulls are going out of state, they may need additional tests. This process may take a few days. Bar CK ranch will feed and house animals during this process.

VOLUME DISCOUNT

A 5% discount will be given on purchases of five or more bulls.

TERMS

Terms of sale are cash or check payable immediately upon conclusion of the sale and before animals will be removed.

SEMEN INTEREST

Seller retains 1/3 semen interest in all bulls selling.

RISK

Each animal becomes the risk of the producer as soon as it is sold. Animals purchased are at the producer's risk as to loss or injury, and will be loaded according to purchasers direction.

ANNOUNCEMENTS

Announcements from the auction block will proceed over statements in the catalog. Disclaimer: the information in this catalog is subject to change.

ONLINE BIDDING

Bid online and watch the sale live
at superiorlivestock.com

BULL GUARANTEE

Unless otherwise noted, all breeding age bulls will have passed their breeding soundness exam prior to pickup and delivery. In addition to the standard terms and conditions of the American Simmental Association, we will provide the first breeding season (the 90 day period immediately following turnout) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risk for injury due to running bulls together or management decisions outside genetic control. For guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal was sold. We will work with you to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided of equal or greater value, we will issue a sale credit to be used in a future sale for full purchase price of a bull less the salvage value of the animal.

LIABILITY

Neither owners nor sale management assume any liability for any accidents that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents.

BOARDING

Bulls will be wintered at no additional charge until March 1st, 2026. Bulls have passed a thorough breeding soundness exam prior to sale date and will be ready to take home sale day. Since each animal becomes a risk of the producer as soon as sold, we strongly recommend a mortality insurance policy be taken out on any animal that is left to be wintered. Any bulls left past March 1st, 2026 will incur a \$3/day feed charge.

SALE LOCATION

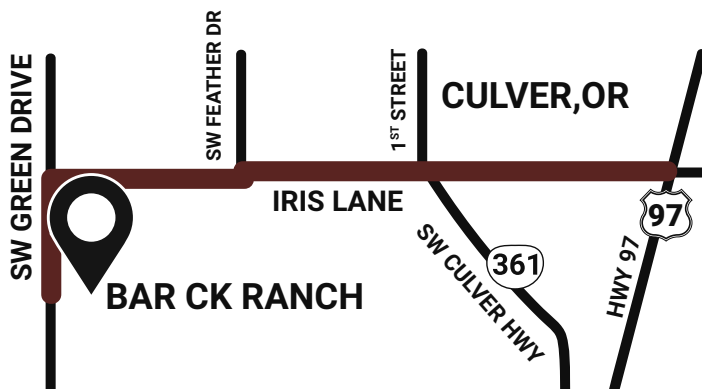

Bar CK Ranch

8925 SW Green Dr.
Culver, OR 97734

Directions:

From Redmond: Take Hwy 97 North for 15.7 miles, turn slight left on Old Culver Hwy 361 for 2.7 miles, turn left on Iris Lane for 1.0 miles, turn left on SW Feather Dr. for .01 miles, take the first right on SW Iris Lane for 1 mile, turn left on Green Dr. for .8 miles, turn left to Bar CK Ranch.

From Madras: take Hwy 97 South for 8.3 miles, turn right on SW Iris Lane for 2.3 miles, turn left on SW Feather Dr. for 0.1 miles, take the first right onto SW Iris Lane for 1 mile, turn left on Green Dr. for 0.8 miles, turn left to Bar CK Ranch.

YOUR BOTTOM LINE STARTS HERE

On behalf of Bar CK Cattle I would like to invite you to the 13th annual "Profit Sharing Bull Sale" which will be held once again at the Bar CK Ranch in Culver, Oregon on Thursday February 12, 2026.

Since 2005 we have been dedicated to breeding cattle for only one purpose, our **Customers Profitability**. I am sure you have heard other seed stock producers make similar claims. Bar CK hasn't just talked the talk, we have walked the walk. When deciding cow matings over the last 2 decades we have never once considered how much we could sell the resulting progeny for, but rather how the results would impact our customer's bottom line. We have done this by focusing on the IGS (International Genetics Solutions) whole lifecycle profit indexes, API and TI. IGS is the largest multi breed database in the world of well over 20 million. API, all-purpose index, has been the main breeding tool we have used. It predicts the differences in sires' contributions to profitability when mated to both first calf heifers and mature cows with a portion of their daughters retained to maintain herd size and the remaining of the heifers and steers put on feed and sold on a grade and yield basis. TI, terminal index, predicts the differences in sires' contribution to profitability when mated to mature cows and all offspring are put on feed and sold on a grade and yield basis.

Keeping focused on API has led to Bar CK being the highest API herd in the IGS database for well over fifteen years. As a result, the bulls in this sale will be the highest averaging API profit indexing bulls available to buy anywhere in the world. We've added a new wrinkle to our offering this year - RFG Versatile K43. Versatile is the highest Marbling bull in the IGS database with Simmental influence in its pedigree and the 2nd highest TI indexing SimAngus bull with progeny. He boasts extreme growth with extreme marbling while still being in the top 3% STAY, the cow longevity EPD. Versatile has unprecedented STAY for the elite TI indexing bulls. We mated him to our highest calving ease lowest birth weight cows. You will find many bulls in this offering in the top 1% for both profit indexes. Our goal is to one day have every bull in the top 1% for both indexes. No matter which bull you chose you won't have to worry about losing cow longevity or stability, the number one factor affecting cow calf profitability.

Also new for this year is our partnership with 701X, an innovative cattle management and data tracking technology company. For the first time since we started using the IGS profit indexes, I'm excited about something else. Thankfully cattle markets are up but so are the cost of bulls. We want our customers to have peace of mind knowing that their Bar CK bulls are breeding cows. Every bull will have a 701X tag and if the sale price is equal to or greater than \$7500 the buyer will receive the annual service fee (\$75) for the 1st year free. These tags supply all sorts of data. Most importantly for the cow calf producer it will tell you if these bulls are mounting cows. The mad scientist in me believes this is the future of data collection and is how seed stock producers will be able to build more profitable bulls for the beef industry. Even if you don't need a bull, our seminar the night before with 701X will be quite worth your time. Please come and enjoy dinner and refreshments on us.

The bulls have been developed in a large pasture on forage and a few pounds of cake just like a lot of our customers develop their calves. No corn or silage has been fed. We have purposely tried to keep them under 3 lbs./day of gain for better feet, leg structure and semen quality. These fellows are going to breed a pile of cows and last a long time.

So, no matter what your end game is in the cattle business, the most profitable bulls you can buy are right here at Bar CK. Come take a look at our cattle and see for yourself what unique and special offering this is. If you try a glass of our Kool-Aid we guarantee you'll be back for a second one.

Take care,

Mike Alley – Bar CK Cattle Company

Bar CK IM UR Huckleberry 4015M was named after one of our favorite scenes in the movie Tombstone where Doc Holiday tells Johnny Ringo "I'm your huckleberry". We didn't need another Quigley-Target son, we have lots of those wonderful genetics in our herd. But Huckleberry covered so many bases that we just had to select him to cover cows for us in the fall. Not only is he absolutely stunning in the flesh with an incredible set of EPD's but he is the highest growth Quigley we have ever raised. He was the highest yearling weight bull out of the entire offering this year and his ADG EPD ranks him in the top 15% in the IGS database. Not bad coming out of high maternal, moderate growth genetics. Huckleberry just simply covers all the bases. He has already frozen semen and we intend to enroll him in the Simplot CMP program at IGS. We are selling Spring walking rights and will pay for half the freight to ship between Bar CK and the buyer.

KBHR Quigley C154

Sons of KBHR Quigley C154

SIRE OF LOTS 1-3

KBHR Quigley C154 is the most dominant son we have used out of our cornerstone sire Bar CK Tebow, and he clearly demonstrates why we emphasize the influence of profitability traits in the cattle selection process on the maternal side, Quigley's dam originated at Bar CK before going on to become a trusted source for herd sires at the Keller broken Heart Ranch in Mandan ND. Quigley is a homozygous black and polled super sire who ranks among the highest SimAngus bulls in the entire breed for several of the most desired traits including whole lifecycle profitability API, Marbling and Stability. The future of our cow herd has been entrusted in Quigley for several years. His ability to sire females with the moderation needed for our environment and building in longevity is unmatched.

Bar CK Pacific 4094M is named Pacific because of his extremely quiet and peaceful nature. RFG Versatile K43 seems to stamp that attitude on all his progeny. He exemplifies what we are trying to accomplish here at Bar CK. He ranks many times above the top 1% for both profit indexes, API and TI. A bull that has calving ease, growth and extreme marbling with top 4% STAY. You won't be disappointed in his phenotype and structure. This high libido bull recorded 83 mounts in the first 24 hours, covering cows, according to 701X, tops amongst all our herd bulls. He has already frozen semen, and we intend to enroll him in the Simplot CMP program at IGS. We are selling Spring walking rights and will pay for half the freight to ship between Bar CK and the buyer.

SONS OF **TRIF BAR CK PIONEER 244K**

Sons of **TRIF Bar CK Pioneer 244K**

SIRE OF LOTS 28-32

This Galileo son is out of one of the most prolific donors of Kellers Broken Heart Ranch, KBHR Debutante H113 and his granddam is none other than the legendary Bar CK 106Z. TRIF Bar CK Pioneer 244K's first calf crop has impressed us even though we didn't get to use him until late in the breeding season. Pioneer is quiet and free moving with great feet and legs. He is quite possibly the thickest Galileo son in existence. He excels for CE, BW, MCE, STAY and MARB with above average growth. These traits put him beyond the top 1% for API and TI. Pioneer's future at Bar CK is very bright.

HOW TO PARTICIPATE

1 CREATE AN ACCOUNT

Click "create account" at the top of the page on bid.superiorlivestock.com. Fill out the required information to bid online. Agree to the terms of service and finish with the "register" button.

2 REGISTER FOR A BUYER NUMBER

From the home page or the "all auctions" page, choose the sale you're interested in. Once selected, click the "request a buyer number" button. Verify your email address with the email verification link. To verify your mobile number, click "send token". Follow the steps to authorize your mobile device and click "submit".

3 BID SUCCESSFULLY

You will only have to complete the two-step verification process one time. After that, you will be able to immediately request a buyer number on any auction without verification. If you're a winning bidder, your lots will appear in your cart on the bottom of your screen. You will be contacted by the ranch or sale manager for your payment and shipping plans.

IF YOU NEED HELP REGISTERING TO BID

SONS OF BAR CK ESCORT 1041J

Bar CK Escort 1041J

Sons of Bar CK Escort 1041J

SIRE OF LOTS 33-40

Bar CK Escort 1041J is a purebred calving ease specialist that tops the charts for CE, BW, MCE, STAY, MARBLING, API and TI. He is a balanced, smooth made, long bodied bull that travels with ease with plenty of bone and power to pass on to his calf crop. We expect his daughters to be the top of their contemporary groups and positively impact the bottom line.

SONS OF BAR CK RIFLEMAN 1093J

Bar CK Rifleman 1093J

Sons of Bar CK Rifleman 1093J

SIRE OF LOTS 42-47

Bar CK Rifleman 1093J is a calving ease specialist (top 2% CE, 1% BW and 3% CEM) that ranks in the top 1% for STAY. Rifleman is also well above the top 1% for MARB. These traits propel him into the upper Stratosphere for the all-purpose profit index, API. His progeny are very easy fleshing. We think that once we turn in more growth data on Rifleman, he will increase for his growth EPD's. Phenotypically, he's a very smooth bull with sound feet and legs that's easy to look at. Combining Rifleman 1093J with the power and growth potential of RFG Versatile K43 will be a winning combination that keeps us focused on our goal of producing an entire bull lineup that averages in the top 1% for both API and TI.

Sons of Bar CK Mark 0033H SIRE OF LOTS 48-52

Bar CK Mark 0033H was a logical choice to replace his sire, Bar CK Target, he's higher performing and more powerfully made. He also maintains the ability to make incredible replacement heifers. Mark is a tremendous calving sire and ranks in the top 1% for 6 traits (CE, BW, MCE, STAY, MARB and API). We find the Mark sons to be easy to handle and able to work in challenging environments.

A GUIDE TO EPDS

EPD (Expected Progeny Difference):

EPDs predict differences in progeny performance and are the most meaningful predictor of animals' genetic merit.

API (All-Purpose Index):

Predicts differences in sires' contribution to profitability when mated to both Angus first-calf heifers and mature cows with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold on a grade & yield basis.

TI (Terminal Index):

Predicts differences in sires' contribution to profitability when mated to Angus mature cows and all offspring are put on feed and sold on a grade & yield basis.

CE (Calving Ease): Predicts the probability of calves being born unassisted out of 2-yr-old heifers.

BW (Birth Weight): Predicts differences in pounds of birth weight.

WW (Weaning Weight): Predicts differences in pounds of weaning weight.

YW (Yearling Weight): Predicts differences in pounds of yearling weight.

ADG (Average Daily Gain):

Predicts differences in post-weaning gain, expressed in lbs/day.

MCE (Maternal Calving Ease): Predicts the probability of 2-yr-old daughters calving unassisted.

MILK (Milk): Predicts differences in weaning weight due to milk

STAY (Stayability): Predicts probability of daughters staying productive past 6 yrs of age.

MARB (Marbling Score):

Predicts differences in marbling score.

REA (Rib Eye Area): Predicts differences in rib eye area (in²)

SIRE OF LOTS 53-56

Bar CK influence 8103 F is the product of combining the cornerstone herd sires into one eye appealing, soft middled powerhouse bull. Bar CK Tebow worked for 10 years in our pastures, and his daughters and granddaughters are still our preferred female groups. Tebow stamped every positive trade he had into Influence, and on the bottom he's out of 1 of Mikes favorite Target daughters. Influence is a tremendous heifer bull that ranks in the top 1% for 4 traits (BW, STAY, MARB and API).

SIRE OF LOTS 57-62

IR Beacon E010 is an outcross herdsire selected to improve growth EPDs on your more maternally designed cows. He is a homozygous black and polled bull with top end profitability indicators. We find his sire group to be soft designed, free moving and temperament is excellent as evidenced by his top 1% breed rank for docility. His balance for calving ease, growth, stayability and marbling allow him to reach the elite 1% of all sires for both API and TI.

SIRE OF LOTS 63-67

Bar CK/TBEF Gallant 9125G layers GW Vindicator 312E and KBHR Quigley C154 to combine their positive attributes. He's a moderate framed, soft made bull, designed to work in big rough country. He also excels for Marbling, API and TI. We sold Gallant's spring walking rights in the 2021 bull sale to Townsend's in White Sulfur, Montana. We have appreciated Will Townsend's continued support of our program as 9125G works double time between Oregon and Montana.
